Growens Trademarks & Brand Guidelines

These guidelines have been created to help our employees, customers, partners, licensees, outside vendors, and other third parties understand how to use Growens brand features correctly, including Growens logos and trademarks. You are permitted to use the Growens name, logos, artwork, and other brand features only in accordance with our Trademark Guidelines. Any use of Growens brand features contrary to our guidelines is prohibited.

The Growens name, logos, artwork, and other brand features are valuable Growens intellectual property. It is important to use them properly. By using Growens brand assets, you agree to these trademark guidelines, as may be updated from time to time, and you acknowledge that Growens is the sole owner of the Growens trademarks and service marks, and all goodwill derived from their use accrues only to Growens.

Growens may review use of our brand assets at any time and reserves the right to terminate or modify any use.

Logo

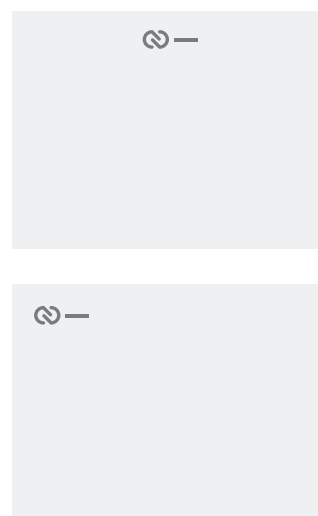

The Logo

We are very proud of our logo, and we require that you follow the following guidelines to ensure it always looks its best. The logo comes in two versions - please choose carefully which one to use according to the below specifications.

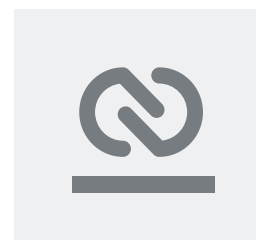

Left Version

To be use left aligned or centered to the page, as the example below shows.

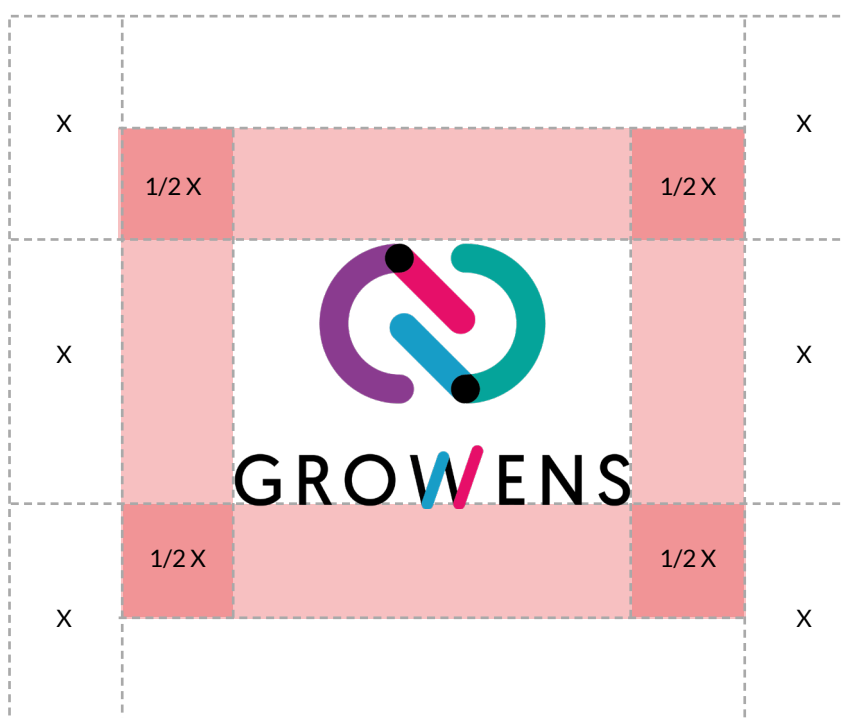

Centered Version

To be use only centrally when the space is square-shaped , as the example below shows.

Clearspace

Our logo should always have space to breathe. We have two clear zones. The minimum clear space is highlighted in red - never place anything in it. The optimal clearspace equals the logo's height.

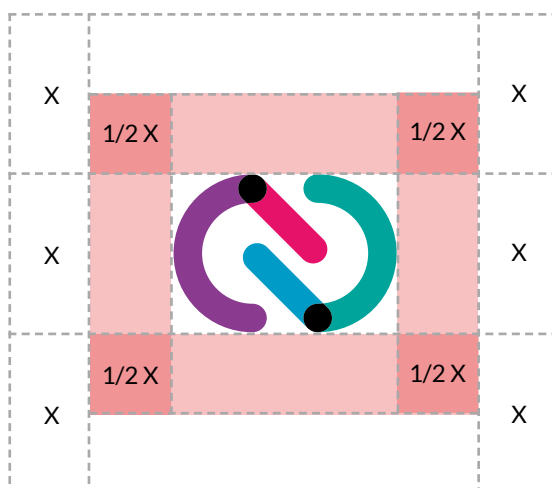

Logomark

In cases when the Growens brand has already been established, the logomark can be used on its own - e.g. on the second and following pages of a PPT presentation.

Logomark Clearspace

Colour Variations

When on dark background or on image, the all-white logo variation must be preferred. On white or light gray colour, the all-black logo can be used as a variation of the main logo, but only when the full-colour logo has already been used. Always be sure to give the right contrast to ensure maximum readability.

Logo Misuse

It is important that the appearance of the logo remains consistent. The logo should not be misinterpreted, modified, or added to. No attempt should be made to alter the logo in any way. Its orientation, colour and composition should remain as indicated in this document — there are no exceptions.

NO

Do not rotate the logo

NO

Do not change the logo colour or tone

NO

Do not distort or warp the logo in any way

NO

Do not reverse the logo

NO

Do not manipulate the logo

Colour Proportions

Corporate colours are selected to work on all media.

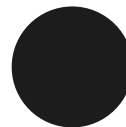

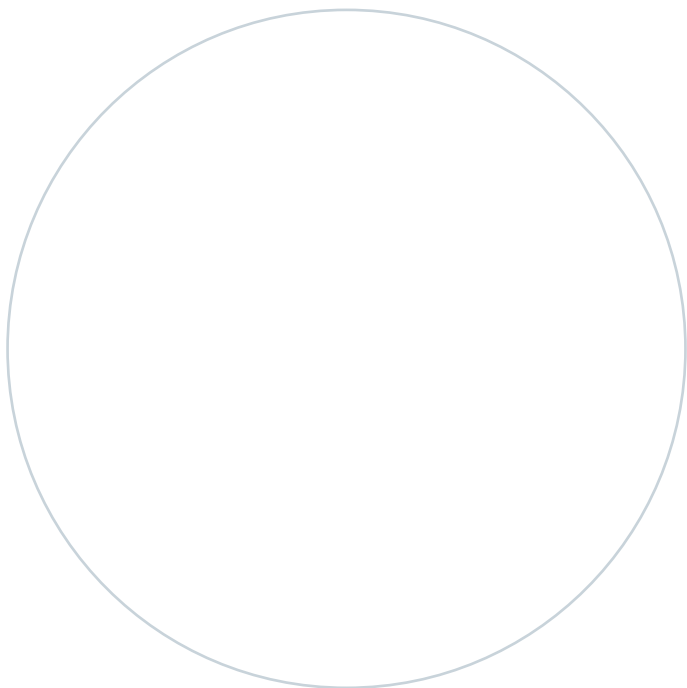

White should be used for backgrounds (about 90% of the available space). Black and Cool Gray should be used for all information (about 8%). Rubine Red can be used for highlighting (about 1.5% of space). Violet, Pacific and Persian can be used for 0.5% of the space.

Please note: these proportions are a recommendation, percentages are approximated and provide a general indication. Circle sizes have a representative ratio for an illustration purpose.

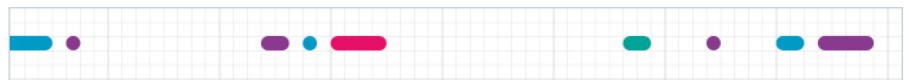

Graphic Pattern

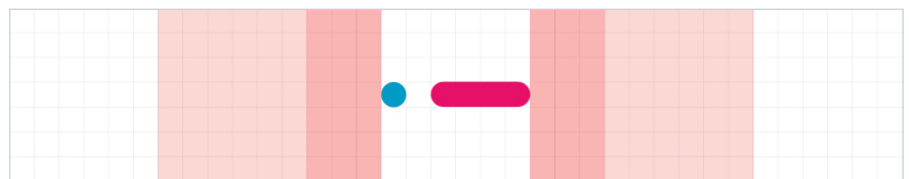

Composition

Our graphic pattern - nicknamed “bit” - is derived from the graphic traits that make our logo. It is composed of 3 elements with alternating colours. The model is built on a regular grid.

Graphic elements are always mixed in size and colour to create pleasant and non-repetitive horizontal blocks.

Allow at least 3 columns between the graphic blocks on the same row.

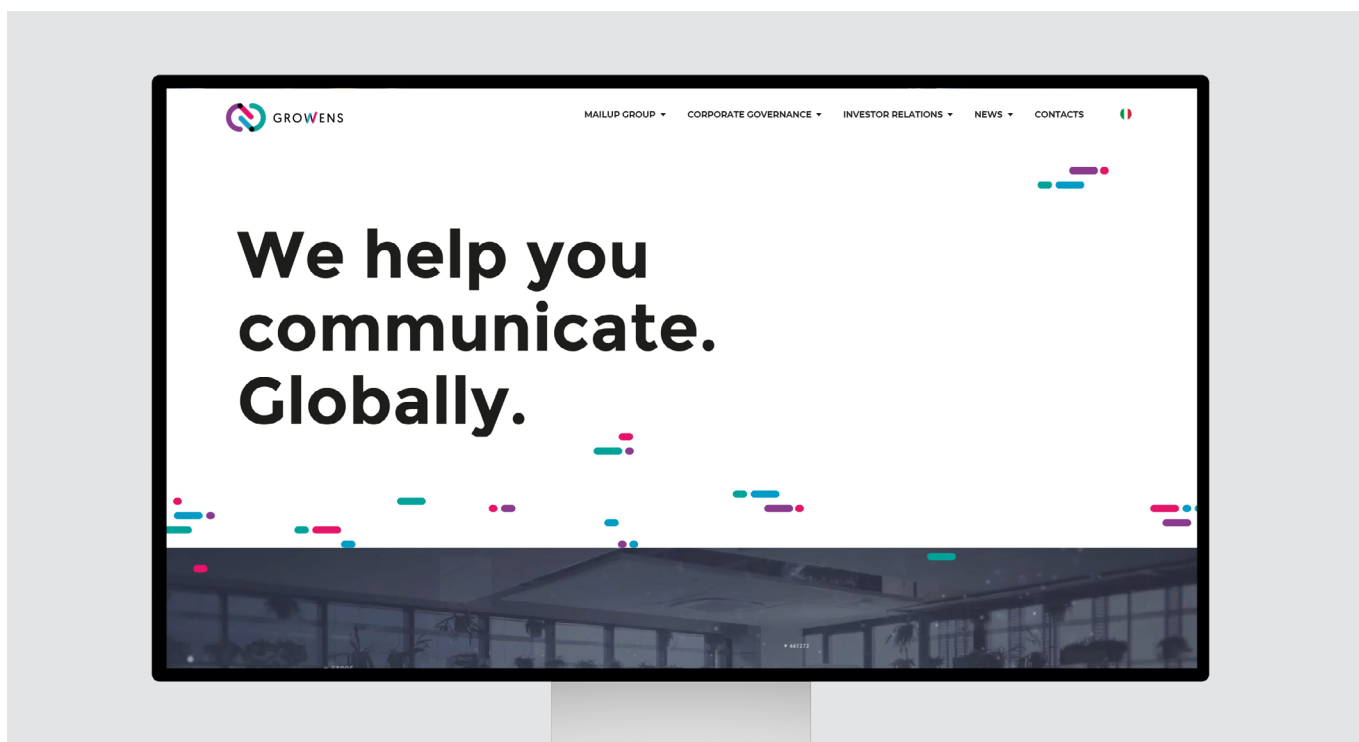

Always put the elements on alternate rows and don't overcrowd them.

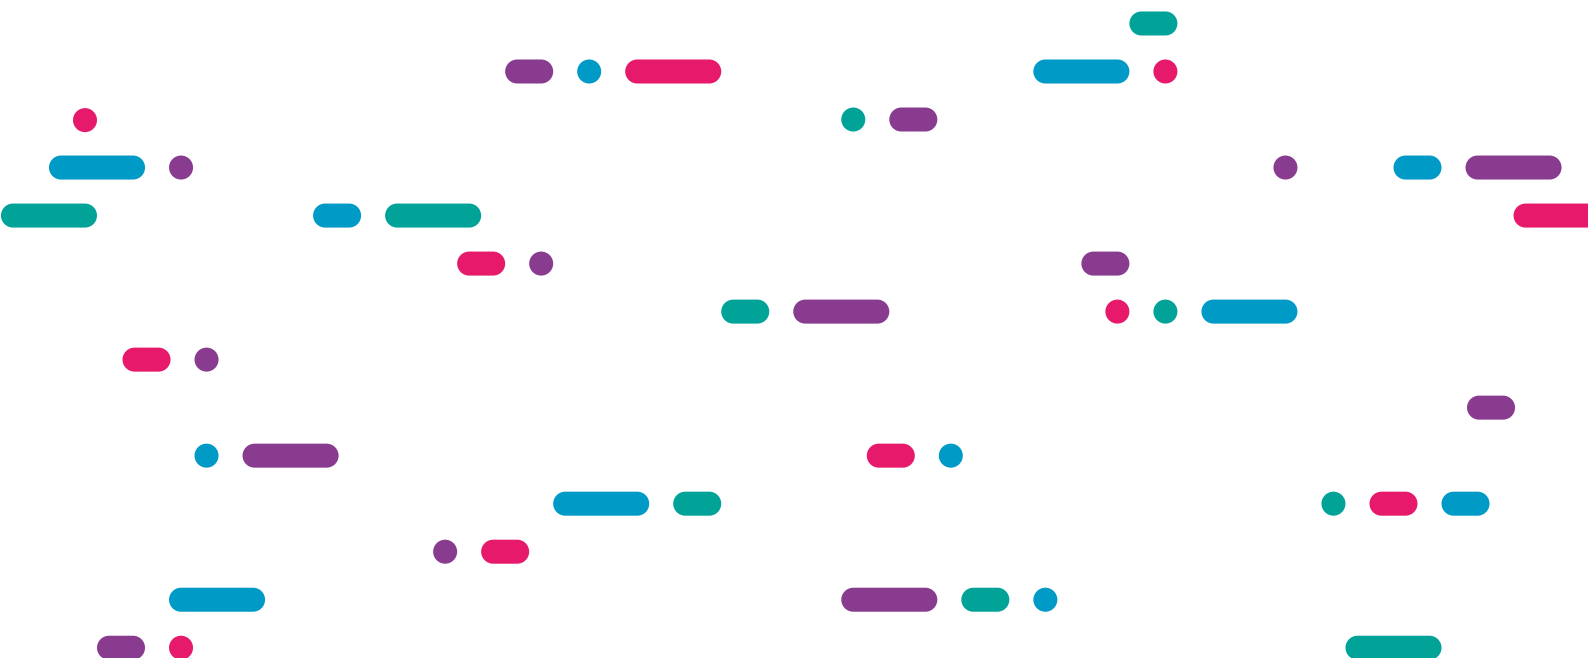

Usage

Our pattern is our hallmark in our communication. We can use it in any official and non-official communication, in advertising and in publications. In any case, it should not be overused and should only be included on the main pages. It can cover the whole page or only part of it.

Typography

Typography

Our brand is modern and young, but also sophisticated and high-end. Typography reflects such concepts and is designed to maintain this perfect balance.

Social Network Images

People / Moodboard

We prefer high-quality portraits in which the subject is posing on a flat white / light background, relaxed or smiling. The main colours of the image should be as neutral as possible, but complementary or analogous colours to the ones of our logo are also acceptable.

Other / Moodboard

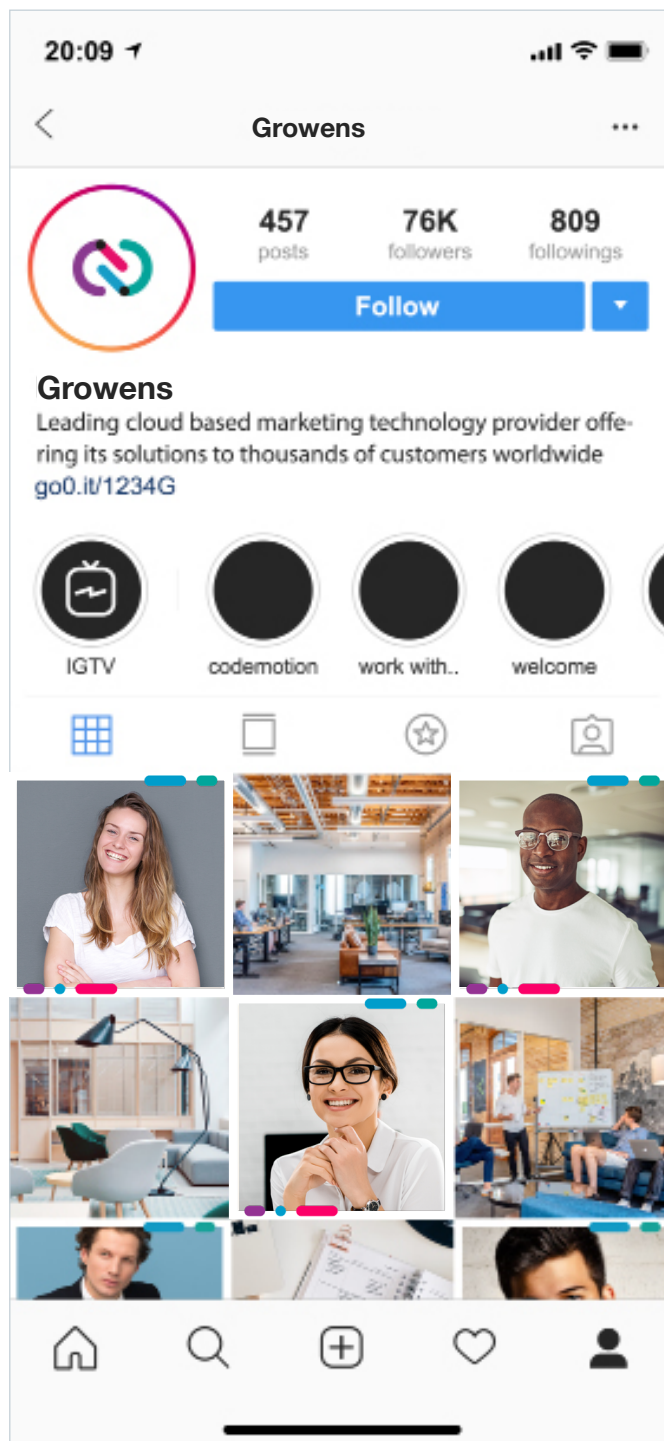

Generally speaking, the right images to be used in our social feeds or on our website have a white (or light) colour prominence. Images with a spot of one or more brand colours are also permitted. Avoid pictures with a high level of noise. Always prefer a minimalist style.

Instagram Template for Portraits

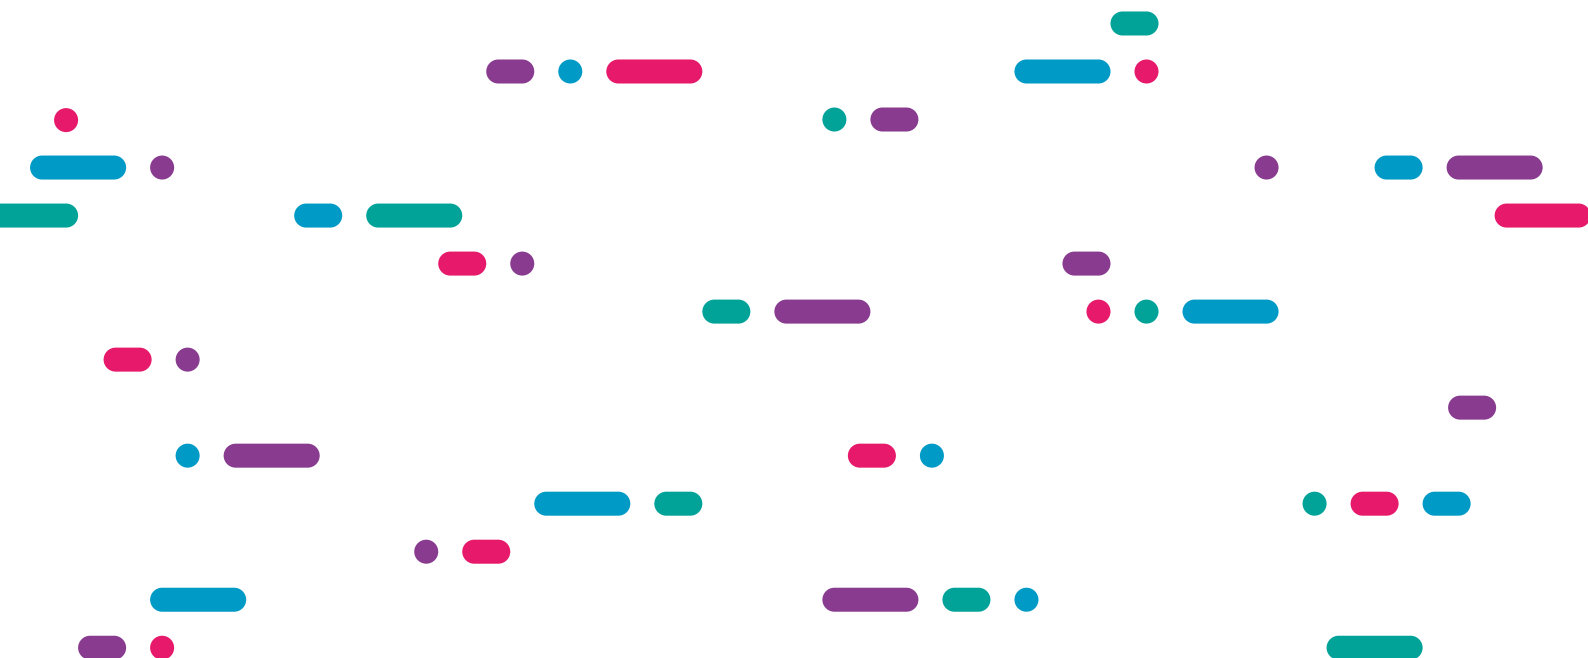

The portraits are distinguished by a white frame and a pattern overlay.

Buttons

Buttons

Buttons use a consistent style across media and channels. There should always be one primary CTA, with the addition - if needed - of one or more secondary CTAs.

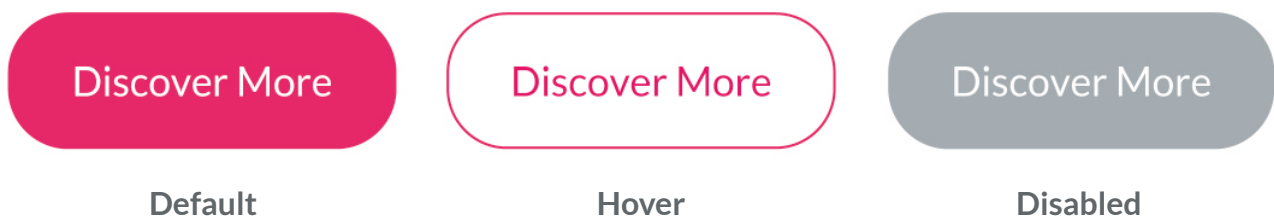

For all types of buttons, two rules must be followed:

1. Button text must never span more than 1 line
2. Button height must be consistent with font size

Primary button

Primary buttons are used for the most prominent CTA (call-to-action) in the page or communication, usually by position and importance. They toggle among three states and can be resized based on text length.

Properties

Secondary button

Secondary buttons are used for any additional CTAs in the page or communication. They toggle between two different states and can be resized based on text length.

Hyperlinks

Hyperlinks

A hyperlink (or a link) is a reference to specific data that an user can find by clicking (or tapping). The font size can change accordingly to the typography and the text part where it can be found. Other properties must not change.

Colour Significance

If you need to signify a positive or negative trend, result or data point in your chart, colours can help. Green and red generally stand respectively for positive and negative results: we respect such universal significance in our representations.

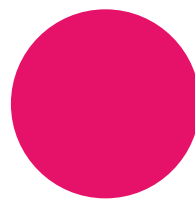

Further colour subsets, as shown below, can be used to integrate charts when more colours are needed.

Slide Decks & Presentations

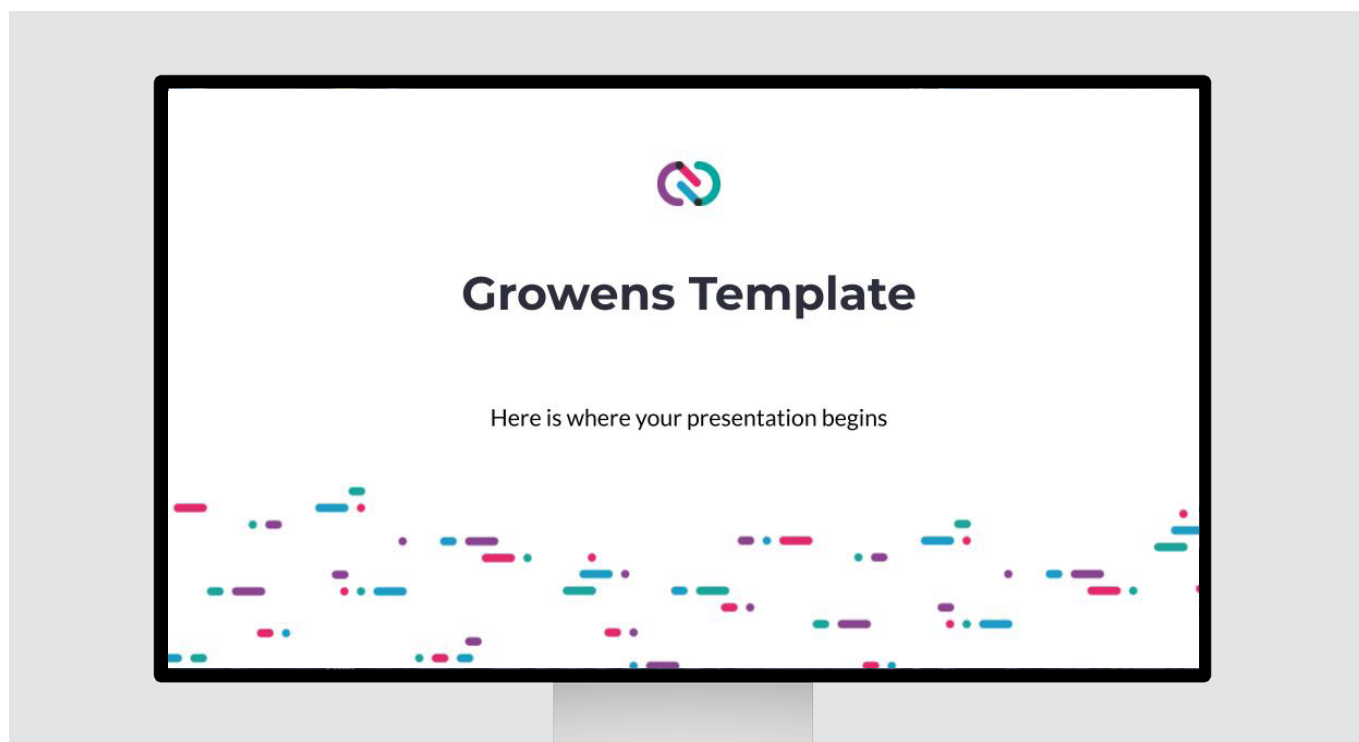

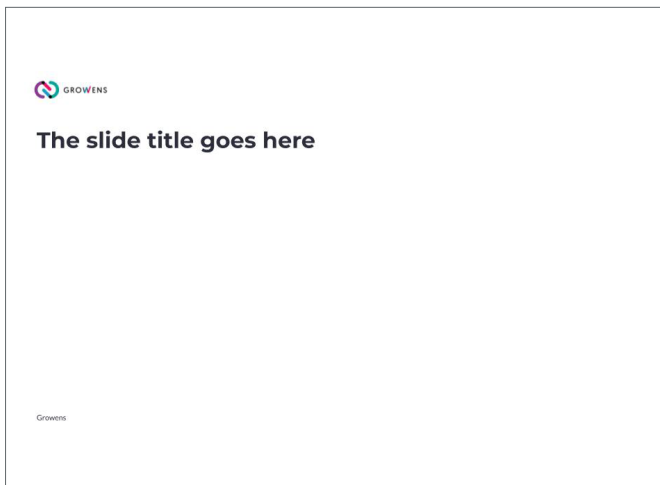

Google Presentation Template

All Group presentations - both for internal and external use - must be based on the official Growens template, available in Google Presentations, PowerPoint and Keynote formats.

You can find the template on Drive, on our Intranet or by selecting *New Presentation > From a template* on Google Drive.

For presentations fonts and colours, general brand rules apply.

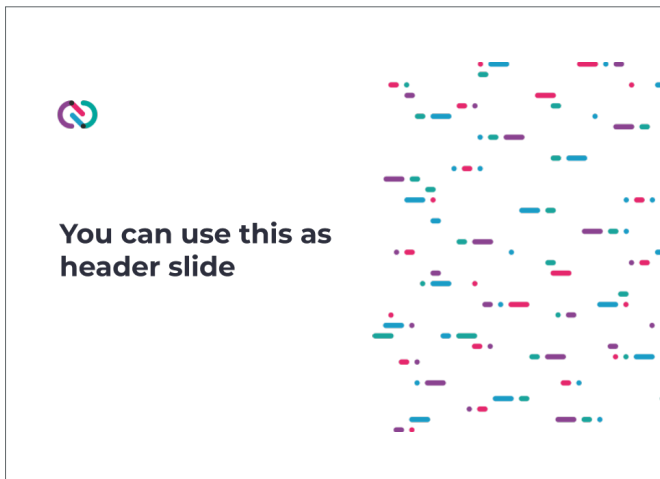

Alignment & Spacing

Please use the text placeholders you'll find in the presentation template to properly insert texts and images.

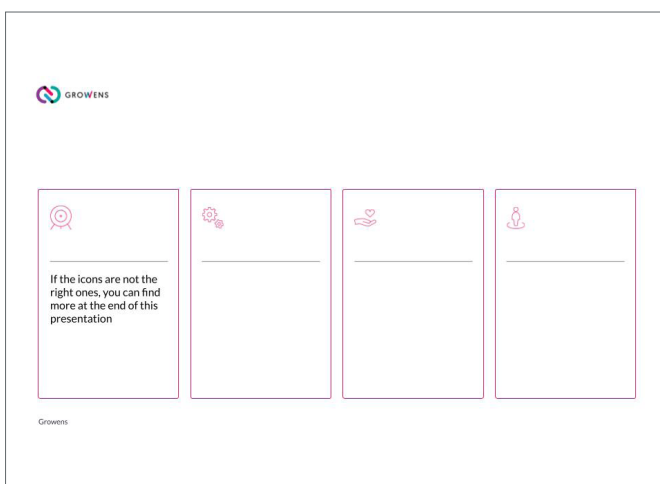

All titles and texts should be left aligned. Please avoid stuffing slides with too much content, and allow plenty of white space.

Bits

Bits are the signature graphic pattern of our brand. Their shape and irregular distribution along horizontal lines recalls computer "bits" or Morse code. Use them as suggested in the template as dividers, cover elements and colour accents for otherwise blank slides.

Do not change their orientation (e.g. vertically).

Icons & Images

At the end of the presentation template you will find a gallery of on-brand icons to choose from. Icons should always be outlined and Rubine Red in colour. Please refer to the *Icons* chapter of this Brand Book for more information.

When using images, please refer to the *Images* chapter to know which ones are suitable.
