Growens (NEUTRAL)

ARR at 30 June 2025

Results. Yesterday, Growens disclosed the following preliminary data as of June 2025:

- ARR (annual recurring revenues) of the SaaS business line as at end-June were +18.6% yoy at EUR 15M (+24.2% yoy at constant forex) thanks to higher volumes and usage;
- CPaaS business line's preliminary 2Q25 sales stood at EUR 14.6M, -7.8% vs. 2Q24 due to the company's focus on margins rather than volumes.

What we think: We like the acceleration by Beefree and recall that in 1Q25 its acceleration was supported by sales and marketing investments that the company had implemented.

Valuation methodology (long-term horizon: 12M)

The Intesa Sanpaolo SpA Equity Research Department values the companies for which it assigns recommendations as follows:

We obtain a fair value using a number of valuation methodologies including: discounted cash flow method (DCF), dividend discount model (DDM), embedded value methodology, return on allocated capital, break-up value, asset-based valuation method, sum-of-the-parts, and multiples-based models (for example PE, P/BV, PCF, EV/Sales, EV/EBITDA, EV/EBIT, etc.). The financial analysts use the above valuation methods alternatively and/or jointly at their discretion. The assigned target price may differ from the fair value, as it also takes into account overall market/sector conditions, corporate/market events, and corporate specifics (i.e. holding discounts) reasonably considered to be possible drivers of the company's share price performance. These factors may also be assessed using the methodologies indicated above.

Equity rating key: (long-term horizon: 12M)

From 22 November 2024, in its recommendations, Intesa Sanpaolo SpA uses a relative rating system on a 12M horizon, whose key is reported below. Intesa Sanpaolo's investment ratings reflect the analyst's/analyst's team assessment of the stock's total return (the upside or downside differential between the current share price and the target price plus projected dividend yield in a 12M view) as well as its attractiveness for investment relative to other stocks within its coverage cluster.

A stock's coverage cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector or other classification. The list of all stocks in each coverage cluster is available on request.

Equity Rating Key (long-term horizon: 12M)

Long-term rating	Definition
BUY	BUY stocks are expected to have a total return of at least 10% and are considered the most attractive stocks in the
	analyst's/analyst's team cluster in a 12M period.
NEUTRAL	NEUTRAL stocks are expected to have a total return of at least 0% and are less attractive stocks than BUY rated
	stocks in the analyst's/analyst's team cluster in a 12M period.
UNDERPERFORM	UNDERPERFORM stocks are the least attractive in a coverage cluster in a 12M period.
RATING SUSPENDED	The investment rating and target price for this stock have been suspended as there is not a sufficient fundamental
	basis to determine an investment rating or target price. The previous investment rating and target price, if any, are
	no longer in effect for this stock.
NO RATING (NR)	The company is or may be covered by the Research Department but no rating or target price is assigned either
	voluntarily or to comply with applicable regulations and/or firm policies in certain circumstances.
TENDER SHARES (TS)	We advise investors to tender the shares to the offer.
TARGET PRICE	The market price that the analyst believes the share may reach within a 12M time horizon.
MARKET PRICE	Closing price on the day before the issue date of the report, as indicated on the first page, except where otherwise
	indicated.
Note	Intesa Sanpaolo assigns ratings to stocks as outlined above on a 12M horizon based on a number of fundamental
	drivers including among others, updates to earnings and valuation models. Exceptions to the bands above may
	occur during specific periods of market, sector or stock volatility or in special situations. Short-term price movements
	alone do not imply a reassessment of the rating by the analyst.

Important Note: The current rating system has been in place since 22 November 2024. On 7 April 2025, the rating names were subsequently updated to BUY (previously BUY), NEUTRAL (previously HOLD) and UNDERPERFORM (previously SELL) on an unchanged rating methodology. Please refer to the ISP Equity Rating informative note of 22 November, subsequently updated on 7 April 2025, for further details at the following link: https://group.intesasanpaolo.com/it/research/equity---credit-research. Intesa Sanpaolo had previously used an absolute rating system based on the following ratings: BUY (if the target price is 10% higher than the market price), HOLD (if the target price is in the range 10% below or 10% above the market price), SELL (if the target price is 10% lower than the market price). After 22 November 2024, analysts review and assign ratings on their coverage according to the rating system presented above. For additional details about the old rating system, please access research reports dated prior to 22 November at https://cardea.intesasanpaolo.com/homepage/#/public or contact the research department.
